

**A Group-Average FC Matrix (N = 3, 5 runs)
Schaefer-200 parcellation, Yeo-7 network order**

**B Within-Network FC by Network
Error bars = SD across 5 runs**

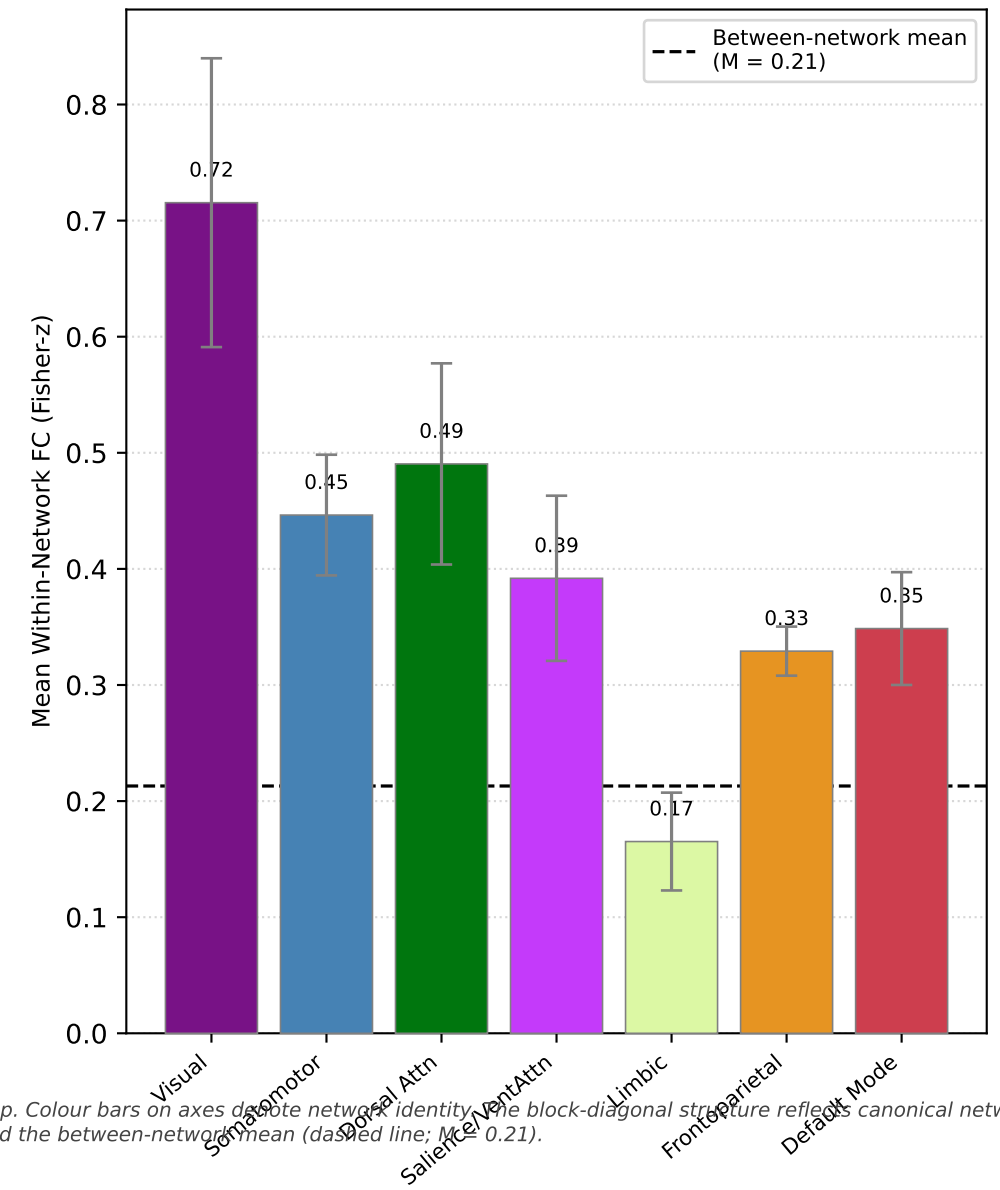

Fig. 2 | Group-average functional connectivity matrix (N = 3 subjects, 5 runs, ds007318). Panel A: 200×200 FC heatmap ordered by Yeo-7 network membership. Colour bars on axes denote network identity, the block-diagonal structure reflects canonical network organisation. Panel B: Mean within-network FC per network (error bars = SD across runs). All networks exceed the between-network mean (dashed line; M = 0.21).
